

MUHAMMAD IBRAHIM KHAN

Enterprise Full-Stack Developer

📍 Lahore, Pakistan ✉ ibrahimkhanwork7@gmail.com ☎ +92-3345019225 [in LinkedIn](#) [Portfolio](#)

SUMMARY

Enterprise Full-Stack Developer with 3+ years of experience building and modernizing multi-tenant healthcare, pharmaceutical traceability, ERP, and automation systems. Skilled in ASP.NET Core, Angular, SQL Server, Python, and Flutter, with practical experience in REST APIs, authentication, tenant isolation, role-based access control, legacy modernization, automated testing, and production support. Experienced in translating business and compliance requirements into secure, maintainable software within Agile teams.

SKILLS

Languages:	C#, Python, SQL, JavaScript
Backend & Frameworks:	ASP.NET Core, .NET Framework/MVC, Entity Framework Core, Django, Flask, REST APIs
Databases:	SQL Server, PostgreSQL, MySQL, Stored Procedures, Query Optimizations
Cloud & Tools:	AWS, Azure, Docker, Git, GitHub, Jira
Testing & Automation:	Selenium, Postman, Unit Testing, Test Automation

EXPERIENCE

Full-Stack Developer | Epazz Tech | Lahore, Pakistan | December 2025 - Present

- Develop and modernize multi-tenant EHR and pharmaceutical traceability platforms using .NET 8, ASP.NET Core, Angular, SQL Server, and Flutter.
- Build and review REST APIs and workflows involving authentication, role-based permissions, tenant isolation, auditability, serialized products, shipments, traceability, and data exports.
- Contribute to ONC-related Electronic Health Information export and HIPAA-aligned security work, including authorization, protected data access, export tracking, and audit controls.

ASP.NET Developer | Sanwa Systems | Islamabad, Pakistan | November 2023 - November 2025

- Maintained and enhanced an enterprise automotive ERP built with ASP.NET MVC, C#, Entity Framework, and SQL Server while supporting modernization toward ASP.NET Core and Angular.
- Independently designed and developed inventory, warehouse, logistics, order-management, and export workflows used in day-to-day business operations.
- Implemented backend services, business rules, validation logic, SQL queries, stored procedures, and database integrations for operational modules.

Part-Time Backend Python Developer | Spacedome (NASTP) | Islamabad, Pakistan | May 2023 - April 2024

- Developed and maintained Python backend services and REST APIs using Django and Flask while completing undergraduate studies.
- Built Selenium automation and web-scraping workflows for browser tasks, structured data extraction, validation, and repetitive-process automation.

Software Development Intern | Spacedome (NASTP) | Islamabad, Pakistan | February 2023 - April 2023

- Supported an IoT-based automation initiative involving Python, PostgreSQL, sensor data, APIs, real-time monitoring, and hardware-software integration.

SELECTED PROJECTS

ZenaTrace Pharmaceutical Traceability Platform | Epazz Tech | 2026 - Present

- Developed and validated a multi-tenant Angular and ASP.NET Core web MVP for pharmaceutical master data, serial generation and import, commissioning, aggregation, shipments, trace events, files, exports, dashboards, users, roles, and permissions.
- Implemented and reviewed tenant-aware data access, secure browser and mobile authentication, refresh-token rotation, auditability, SQL Server Full-Text Search, Redis caching, Amazon S3 file handling, and automated verification with Playwright and backend tests.

Multi-Tenant EHR Modernization and EHI Export | Epazz Tech | 2026 - Present

- Supported a live .NET Framework and WebForms EHR while contributing Angular interfaces and ASP.NET Core/.NET 8 APIs for a gradual, API-driven modernization.
- Developed key backend functionality for patient and population EHI exports, including protected endpoints, ZIP artifact generation, manifest and dataset output, export history, status tracking, filters, limits, and audit-oriented controls.

Enterprise ERP Platform Modernization | Sanwa Systems | 2023 - 2025

- Designed and developed inventory, warehouse, logistics, order, and export workflows for an automotive spare-parts ERP serving operations in the UAE and United States.
- Maintained legacy ASP.NET MVC modules, built backend services and REST APIs, optimized SQL Server queries and stored procedures, resolved production defects, and contributed to .NET and Angular modernization.

EDUCATION

Bachelor of Science in Computer Science (BSCS) | Abasyn University, Islamabad | 2024

- Final Year Project: Built an IoT-based home automation system with real-time monitoring and control.
- Active in coding events and technical activities.
